SURGERY CONSENT FORM

Client Name	Patient Name	Patient Age	Procedure	Date
-------------	--------------	-------------	-----------	------

Yes	No	My pet is up to date on vaccinations
Yes	No	My dog is currently receiving heartworm prevention or has tested negative within the past 30 days Note: If your dog is not currently on prevention we will perform a heartworm test which costs \$ 52.00
Yes	No	I understand that the procedure to be performed requires use of anesthetic
Yes	No	I give permission for the performance of any life saving procedures deemed necessary by the attending veterinarian
Yes	No	I understand there will be an additional charge of \$ 50.00 - \$ 120.00 if both testicles are not located in the scrotum.
Yes	No	My pet has had a blood profile done within the past 3 weeks (Date: _____)

PRE-ANESTHETIC BLOOD PROFILE:

Anesthesia places a burden on some of your pet's systems and anemia, kidney, and/or liver disease can significantly affect your pet's ability handle the procedure. A pre-anesthetic profile can alert your doctor to these conditions and provide the information needed to adjust anesthetic levels or delay the procedure. We strongly recommend a pre-anesthetic blood profile to minimize the risk of today's procedure to your pet and to provide baseline information which can be useful in judging your pet's health in the future. **The cost of pre-anesthetic profile:**

Under 7 years of age **\$ 88.00**
Over 7 years of age **\$ 126.00**

Yes	I understand the risks associated with anesthesia and request you complete the recommended pre-anesthetic profile.
No	I understand the risks associated with anesthesia and decline the recommended pre-anesthetic blood profile. Proceed with anesthesia.

POST OPERATION PAIN MANAGEMENT:

MEDICATION-

Post operation pain management medication is included for most procedures for dogs, but optional for cats. Administering pain management medication has proven to speed healing in addition to providing greater comfort.

The cost for pain management medication is \$ 16.00 to \$ 20.00.

Yes	I want to include pain management medication for my pet
No	Do not include pain management medication for my pet

LASER THERAPY-

Laser therapy provides relief for your pet using a deep-penetrating light that releases endorphins and stimulates cells. This therapy will ease pain, improve mobility, and promote faster healing.

The cost for post surgical laser treatment is \$15.00 per site and session.

Yes	I want to include post surgical laser treatment for my pet
No	Do not include post surgical laser treatment for my pet

I understand and accept the risks and financial responsibility for my pet related with this procedure in accordance with the elections above.
